10 December 1953

MEMORANDUM FOR THE RECORD

STAT

STAT

1. [] and the undersigned discussed with [] the general problem relating to "policing" of administrative plans. There was also discussed the related problem of general periodic reviews of administrative plans for adequacy.

2. Another principle point brought out was that there was no central point to accomplish the above. All agreed that primary responsibility rested on the case officer for the project, although there was no real specifically spelled-out action in the Regulations. There was some thought that the proper place to accomplish such policing and review was in the DD/A side of the house. Specifically, it was urged by the undersigned that PAPS would be the appropriate place to accomplish this. [] was somewhat reluctant on this point and wished to discuss it further with his people. He pointed out the large workload at present and that any further duties would slow down the initial writing of plans, both for new and old projects.

3. [] would urge that thought be given to the possibility of having the Commercial Division police and follow-up on administrative plans for proprietary projects. The undersigned suggested to [] that Colonel White was very sympathetic to the workload problem in PAPS and would be willing to consider detailing appropriate individuals to assist, if this were deemed feasible.

4. The matter was left that [] would consider the entire problem further and be in touch with this Office.
